

## How are the British Values developed in Design and Technology?

<b>British Value</b>	<b>Links with Design &amp; Technology</b>
<b>Democracy</b>	To understand that it is not always possible or right to have their own way and understand the value of compromise.
<b>Rule of Law</b>	To understand the importance of safety rules when using tools. To understand and accept that if safety rules are not followed that there are consequences to this.
<b>Individual Liberty</b>	To understand that they are able to listen to others but can use their own ideas and design choices when making a product. To recognise that others' ideas may not be the same as their own but are able to accept this.
<b>Mutual respect/tolerance</b>	To listen to and consider the ideas and opinions of others even if they differ from your own. To be able to take turns during discussions to resolve difficulties or make decisions. To offer supportive comments in evaluations that will improve learning outcomes in a way that is objective but sensitive to the listener.
